

2015 GROW FRUIT CALENDAR

A Sustainable Future for Exuma Environmental Management, Design, and Planning

The Bahamas has a rich diversity of fruit trees including sapodilla, calamondin, star apple, and mamey. They bear Bahamian flavors, smells, colors, and sounds. Growing fruit will strengthen bonds between agriculture, landscape, health, and education. Eating local fruits supports local economy and lifestyles, and is healthier for people and the environment. Growing fruit is a way of valuing being Bahamian.

1

W1 POND APPLE
ANNONA GLABRA
Plant form Deciduous, grows in clumps • **Peak Flowering Period** Dec to Feb • **Flower Color** White • **Fragrance** None • **Peak Fruiting Period** Jan to Apr • **Fruit Color** Green to yellow • **Fruit Description** Oval • **Taste** Reminiscent of ripe honeydew melon

W2 PASSION FRUIT
PASSIFLORA EDULIS
Plant form Evergreen, vine • **Peak Flowering Period** May to Oct • **Flower Color** White • **Fragrance** None • **Peak Fruiting Period** July to Oct • **Fruit Color** Yellow or dark purple • **Fruit Description** Round to oval, skin turns translucent and waxy as ripens • **Taste** Sweet and seedy

W3 PINEAPPLE
ANANAS COMOSUS
Plant Form Deciduous, short stout stem with a rosette of waxy, straplike leaves • **Peak Flowering Period** June to Aug • **Flower Color** Light purple to red • **Fragrance** None • **Peak Fruiting Period** Nov to Feb • **Fruit Color** Brownish-yellow scales with green tufted leaves on the top • **Fruit Description** Cylindrical and oval, fruit develops from many small fruits fused together • **Taste** Sweet and tart

W4 POMEGRANATE
PUNICA GRANATUM

Plant Form Perennial, multi-stemmed shrub/tree, upright branches droop gracefully, herbaceous • **Peak Flowering Period** May to Sept • **Flower Color** Yellowish pink to deep coral flower • **Fragrance** None • **Peak Fruiting Period** Oct to Mar • **Fruit Color** Light pink to deep red or purple • **Fruit Description** Oval or nearly round, leathery hard skin, flesh developed on the outer seed coat • **Taste** Sweet or sour

W5 SEAGRAPE
COCCOLOBIS UVIFERA
Plant Form Evergreen, messy plant, vase shaped canopy • **Peak Flowering Period** June to Aug • **Flower Color** White • **Fragrance** None • **Peak Fruiting Period** Aug to Sept • **Fruit Color** Green turns purple • **Fruit Description** Grape-like cluster form • **Taste** Sweet and mildly astringent

W6 INDIA JUJUBE
ZIZYPHUS MAURITIANA
Plant Form Evergreen, starts as a shrub, grows into small tree • **Peak Flowering Period** All year • **Flower Color** Light green • **Fragrance** None • **Peak Fruiting Period** Feb to Aug • **Fruit Color** Light green or yellow to red • **Fruit Description** Oval or round • **Taste** Sweet and sour, reminiscent of apples

2

W7 CANISTEL
POUTERIA CAMPECHIANA
Plant Form Evergreen, tall and erect • **Peak Flowering Period** Apr to May • **Flower Color** Greenish white • **Fragrance** Fragrant flowers • **Peak Fruiting Period** Sept to Feb • **Fruit Color** Green to yellow • **Fruit Description** When unripe the fruit is hard and gummy internally. On ripening, the skin turns very smooth and glossy • **Taste** Sweet

W8 AKEE
BLIGHIA SAPIDA
Plant Form Medium sized, evergreen • **Peak Flowering Period** Feb to Apr, July to Oct • **Flower Color** Greenish white • **Fragrance** None • **Peak Fruiting Period** Feb to Apr, July to Oct • **Fruit Color** Red • **Fruit Description** Creamy in texture, turns red and splits open when mature, pod opens to expose three or four cream colored sections of flesh topped with glossy black seeds • **Taste** Rich and nutty with a slightly bitter finishing taste

W9 POMELO
CITRUS GRANDIS
Plant Form Evergreen, crooked trunk and low, irregular branches • **Peak Flowering Period** Mar to June • **Flower Color** White • **Fragrance** None • **Peak Fruiting Period** All year • **Fruit Color** Pale green to yellow • **Fruit Description** Globular to oblate, thick peel with cotton-textured pith • **Taste** Sweet and slightly acidic

3

W10 CITRON
CITRUS MEDICA
Plant Form Evergreen, small tree with stiff branches and twigs, can be grown in container • **Peak Flowering Period** Apr to May • **Flower Color** White • **Fragrance** Fragrant flowers, flowers and leaves • **Peak Fruiting Period** All year • **Fruit Color** Light green to yellow • **Fruit Description** Various shapes, rough and bumpy skin, thick and fleshy • **Taste** Sour

W11 SURINAM CHERRY
EUGENIA UNIFLORA
Plant Form Evergreen, large shrub or small tree • **Peak Flowering Period** Late winter to early spring • **Flower Color** White • **Fragrance** Fragrant flowers • **Peak Fruiting Period** Mar to May • **Fruit Color** Green to dark red and deep maroon • **Fruit Description** Thin skin; orange-red flesh melting and very juicy • **Taste** Sour to sweet

W12 LIMEQUAT
CITRUS X FLORIDANA

Plant Form Evergreen, small compact, bushy canopy • **Peak Flowering Period** May to July • **Flower Color** White with a tinge of pink • **Fragrance** Fragrant flowers • **Peak Fruiting Period** July to May • **Fruit Color** Light green to yellow • **Fruit Description** Round or oval with thick and shiny green skin, yellow pulp • **Taste** Sweet, tart and slightly bitter

W13 CASHEW APPLE
ANACARDIUM OCCIDENTALE
Plant Form Evergreen, bushy, low growing and spreading • **Peak Flowering Period** Mar to May • **Flower Color** Yellowish pink • **Fragrance** None • **Peak Fruiting Period** Mar to May • **Fruit Color** Green to yellow or red • **Fruit Description** Usually pear-shaped, waxy skin, fibrous and juicy pulp • **Taste** Sweet and mildly acidic

W14 CHAYOTE
SECHUM EDULE

Plant Form Perennial vine, climber with tenacious tendrils • **Peak Flowering Period** Oct to Dec • **Flower Color** Yellow green • **Fragrance** None • **Peak Fruiting Period** Mar to May • **Fruit Color** Green to yellow • **Fruit Description** Round or pear-like shape, waxy skin • **Taste** Delicate and mildly sweet

W15 TAMARIND
TAMARINDUS INDICA

Plant Form Evergreen, large tree, round shape, dense crown • **Peak Flowering Period** June to Aug • **Flower Color** Red yellow • **Fragrance** None • **Peak Fruiting Period** Aug to Sept • **Fruit Color** Brown • **Fruit Description** Glossy brown pods • **Taste** Sweet and sour

4

W16 LIME
CITRUS AURANTIFOLIA
Plant Form Evergreen, shrubby, spreading branches • **Peak Flowering Period** All year • **Flower Color** White in clusters • **Fragrance** Aromatic leaves • **Peak Fruiting Period** Apr to June, Oct to Dec • **Fruit Color** Dark green to light green and yellow • **Fruit Description** Oval and tender, juicy pulp • **Taste** Tart and acidic

W17 JAMAICA CHERRY
MUNTINGIA CALABURA
Plant Form Evergreen, horizontal branching, large tree • **Peak Flowering Period** Mar to Oct • **Flower Color** White • **Fragrance** None • **Peak Fruiting Period** Apr to Oct • **Fruit Color** Red or yellow • **Fruit Description** Wide with smooth, thin, tender skin and light-brown, soft, juicy pulp • **Taste** Very sweet, musky, fig-like flavor

W18 SATIN LEAF
CHRYSOPHYLLUM OVILIFORME
Plant Form Evergreen, large, oval from crown • **Peak Flowering Period** All year • **Flower Color** White • **Fragrance** None • **Peak Fruiting Period** All year • **Fruit Color** Green to dark purple • **Fruit Description** Size of an olive with a gum-like skin that is very chewy • **Taste** Sweet

W19 OTAHEITE GOOSEBERRY
PHYLLANTHUS ACIDUS

Plant Form Deciduous, ornamental shrub, small tree, high and spreading, bushy • **Peak Flowering Period** All year • **Flower Color** Pink • **Fragrance** None • **Peak Fruiting Period** May to June • **Fruit Color** White to light yellow • **Fruit Description** Ribbed, waxy, crisp and juicy • **Taste** Tart and Sour

5

W20 BARBADOS CHERRY
MALPIGHIA GLABRA
Plant Form Evergreen, large shrub • **Peak Flowering Period** Apr to Sept • **Flower Color** Lavender • **Fragrance** None • **Peak Fruiting Period** May • **Fruit Color** Green to dark or bright red • **Fruit Description** Resembles a cherry in size and color, thin glossy skin, juicy pulp • **Taste** Tart and subacidic

W21 CARISSA
CARISSA GRANDIFLORA
Plant Form Evergreen, shrub • **Peak Flowering Period** May to Sept • **Flower Color** White • **Fragrance** None • **Peak Fruiting Period** May to Sept • **Fruit Color** Green to deep red • **Fruit Description** Oblong, plum-like with numerous small seeds • **Taste** Tart to sweet

W22 MAMEY
MAMMEA AMERICANA
Plant Form Evergreen, short trunk, ascending branches, oval head, dense foliage • **Peak Flowering Period** All year • **Flower Color** White • **Fragrance** Fragrant flowers • **Peak Fruiting Period** May to July • **Fruit Color** Light brown or yellowish-brown • **Fruit Description** Nearly round and slightly soft when ripe, leathery and scurfy skin • **Taste** Sweet

W23 PAPAYA
CARICA PAPAYA

Plant Form Evergreen, giant herbaceous plant, branchless trunk, palm-like head of foliage • **Peak Flowering Period** All year • **Flower Color** White • **Fragrance** None • **Peak Fruiting Period** May to Sept • **Fruit Color** Green to bright yellow or orange • **Fruit Description** Spherical or pear-shaped, smooth skin when ripe • **Taste** Sweet

6

W24 TALLOWOOD PLUM
XIMENIA AMERICANA
Plant Form Evergreen, shrub, perennial, thorns • **Peak Flowering Period** All year • **Flower Color** Yellowish-white • **Fragrance** Fragrant flowers • **Peak Fruiting Period** May to June, Sept to Nov • **Fruit Color** Golden yellow • **Fruit Description** Plum-shape, juicy pulp • **Taste** Mildly subacidic

W25 WHITE SAPOTE
CASIMIROA SP.
Plant Form Evergreen, medium to large tree • **Peak Flowering Period** Mar to May, July to Sept • **Flower Color** Green-yellow • **Fragrance** None • **Peak Fruiting Period** May to July • **Fruit Color** Green to yellowish-green or yellow • **Fruit Description** Oval, thin skin, smooth textured flesh • **Taste** Sweet and creamy

W26 ROSE APPLE
SYZYGIUM JAMBOS
Plant Form Evergreen, large tree, dense crown • **Peak Flowering Period** May to July • **Flower Color** Creamy white to greenish white • **Fragrance** None • **Peak Fruiting Period** May to July • **Fruit Color** Whitish to yellow or rose-pink • **Fruit Description** Oval or slightly pear-shaped. Smooth, thin skin covering a crisp, mealy, dry to juicy layer of flesh • **Taste** Sweet

W27 STAR APPLE
CHRYSOPHYLLUM CAINITO
Plant Form Evergreen, medium-large sized, short trunk • **Peak Flowering Period** All year • **Flower Color** Greenish-yellow, yellow, or purplish-white • **Fragrance** None • **Peak Fruiting Period** June to Aug • **Fruit Color** Red-purple, dark-purple, or pale-green • **Fruit Description** Round baseball size, pulp is soft • **Taste** Sweet

W28 TROPICAL ALMOND
TERMINALIA CATAPPA
Plant Form Deciduous, wide spreading, vase-shape, pyramidal spreading crown • **Peak Flowering Period** Mar to May • **Flower Color** Greenish white • **Fragrance** None • **Peak Fruiting Period** June to Aug • **Fruit Color** Green to pinkish-red or yellow-brown • **Fruit Description** Almond shape with a fibrous, tender shell that surrounds its juicy flesh • **Taste** Reminiscent of almond

W29 SOURSOP
ANONA MURICATA
Plant Form Evergreen, long-branching, bushy • **Peak Flowering Period** All year • **Flower Color** Yellowish-green • **Fragrance** Fruit musk fragrance • **Peak Fruiting Period** June to Oct • **Fruit Color** Dark green • **Fruit Description** Oblong, prickly or bristled skin and a juicy white flesh • **Taste** Slightly acidic and sweet

W30 AVOCADO
PERSEA AMERICANA
Plant Form Evergreen, open canopy, shade tree • **Peak Flowering Period** Sept to Dec • **Flower Color** Yellow green • **Fragrance** Fragrant • **Peak Fruiting Period** July to Nov • **Fruit Color** Light green to dark green or purple • **Fruit Description** Pear-shape or spherical. Smooth or rough skin. Leaves are dark green and glossy on the surface • **Taste** Slightly nutty and rich

7

W31 YELLOW MOMBIN
SPONDIAS MOMBIN
Plant Form Deciduous, large erect shade tree • **Peak Flowering Period** Apr to June • **Flower Color** Small whitish • **Fragrance** Fragrant • **Peak Fruiting Period** Aug to Jan • **Fruit Color** Green to bright yellow • **Fruit Description** Egg-shape, leathery skin with soft, juicy flesh • **Taste** Sweet and subacidic

W32 MAMONCILLO
MELICOCCA BIJUGA
Plant Form Evergreen, medium large tree, attractive, spreading branches • **Peak Flowering Period** Mar to Apr • **Flower Color** Small greenish white • **Fragrance** Fragrant flowers • **Fruit Color** Light to dark green • **Peak Fruiting Period** July to Oct • **Fruit Color** Green • **Fruit Description** Small oval shape, leathery and brittle skin, thin layer of juicy pulp • **Taste** Sweet

W33 SAPODILLA
ACHRAS ZAPOTA
Plant Form Evergreen, medium-sized, upright elegant, distinctly pyramidal when young • **Peak Flowering Period** May to Sept • **Flower Color** White • **Peak Fruiting Period** May to Aug • **Fruit Color** Sandy brown • **Fruit Description** Egg-shape, rough-skin with smooth, yellow to brown pulp • **Taste** Sweet and malty

W34 CALAMONDIN ORANGE
CITRUS MITIS
Plant Form Evergreen, tall, erect, slender • **Peak Flowering Period** All year • **Flower Color** White • **Fragrance** Fragrant flowers and fruit • **Peak Fruiting Period** Aug to Oct • **Fruit Color** Green to orange • **Fruit Description** Small and round, thin and glossy peel, juicy pulp • **Taste** Sweet

8

W35 COCOPLUM
CHRYSOBALANUS ICACO
Plant Form Evergreen, shrub or small tree, expands horizontally as branches touch the ground • **Peak Flowering Period** May • **Flower Color** Small white flower clusters • **Fragrance** None • **Peak Fruiting Period** June to Aug • **Fruit Color** Pale yellow with rose blush or dark purple • **Fruit Description** Plum-like with hard shell • **Taste** Mildly sweet

W36 STRAWBERRY PEAR
HYLOCEREUS UNDATUS
Plant Form Evergreen, climbing cactus, succulent, develops aerial roots • **Peak Flowering Period** July to Aug • **Flower Color** White or gold • **Fragrance** Fragrant flowers, fragrant fruits • **Peak Fruiting Period** Aug to Sept • **Fruit Color** Pink or bright red • **Fruit Description** Oblong to oval, tough skin, white pulp and tiny black edible seeds • **Taste** Sweet

W37 SUGAR APPLE
ANONA SQUAMOSA

Plant Form Deciduous, upright small tree, open crown, irregular branching • **Peak Flowering Period** Mar to May • **Flower Color** Cream custard • **Fragrance** Fragrant flowers, fragrant fruits • **Peak Fruiting Period** Aug to Oct • **Fruit Color** Greenish-yellow • **Fruit Description** Round or heart-shape, skin composed of closely knobbed segments or scales, whitish pulp • **Taste** Sweet

W38 WATERMELON
CITRULLUS VULGARIS
Plant Form Climber • **Peak Flowering Period** Mar to May • **Flower Color** Bright yellow • **Fragrance** None • **Peak Fruiting Period** June to Sept • **Fruit Color** Light green to dark green with pale green-yellowish stripes • **Fruit Description** Round or oblong, smooth hard exterior with juicy flesh • **Taste** Sweet and watery

W39 MUSKMELON
CUCUMIS MELO
Plant Form Annual climber • **Peak Flowering Period** July to Sept • **Flower Color** Bright yellow • **Fragrance** None • **Peak Fruiting Period** Aug to Oct • **Fruit Color** Green or golden • **Fruit Description** Round or oblong, netted or ribbed skin, juicy yellowish, green or pink flesh • **Taste** Mildly sweet and watery

W39 GRAPEFRUIT
CITRUS PARADISI
Plant Form Evergreen, medium-sized tree, rounded top, spreading branches • **Peak Flowering Period** Jan to May • **Flower Color** White • **Fragrance** Aromatic flowers • **Peak Fruiting Period** Nov to Feb • **Fruit Color** Yellow-orange • **Fruit Description** Nearly round or oblate, thick skin, juicy pulp • **Taste** Tart and tangy

W40 COCONUT
COCOS NUCIFERA
Plant Form Palm, stout trunk, slightly curved, swollen base • **Peak Flowering Period** All year • **Flower Color** Creamy yellow • **Fragrance** Sweet scented • **Peak Fruiting Period** All year • **Fruit Color** Green or yellow to brown • **Fruit Description** Nearly round, hard thick husk, thin white fleshy layer with liquid • **Taste** Mildly sweet and nutty

W41 GRAPE
VITIS VINIFERA
Plant Form Deciduous, climber • **Peak Flowering Period** May to Aug • **Fruit Color** Green • **Fragrance** None • **Peak Fruiting Period** Aug through Oct • **Fruit Color** Green turns golden/black/ burgundy depending on variety • **Fruit Description** Edible smooth skin, grows in clusters, juicy pulp • **Taste** Sweet

W42 PRICKLY PEAR
OPUNTIA SPP.

Plant Form Cactus, upright spreading flesh, succulent shrub • **Peak Flowering Period** May to June • **Flower Color** Pink, coral or orange • **Fragrance** None • **Peak Fruiting Period** Nov to Feb • **Fruit Color** yellowish-green to orange-brown • **Fruit Description** Pear-like, thick membrane with needles, yellowish green to orange brown water flesh rich in seeds • **Taste** Sweet

W43 LOQUAT
ERIOBOTRYA JAPONICA
Plant Form Evergreen, grows upward with pointing branches • **Peak Flowering Period** Sept to Mar • **Flower Color** White • **Fragrance** Fragrant flowers • **Peak Fruiting Period** May to Oct • **Fruit Color** Orange or yellow • **Fruit Description** Oval or pear-shaped, tough and leathery skin, grows in clusters • **Taste** Sweet and tangy

W44 LEMON
CITRUS LIMON
Plant Form Evergreen, high crown, clear trunk • **Peak Flowering Period** Mar to Aug • **Flower Color** White • **Fragrance** Fragrant flowers/fruits • **Peak Fruiting Period** July to Oct • **Fruit Color** Green to dark yellow • **Fruit Description** Oval, firm and thick outer peel, juicy pulp • **Taste** Sour

W45 PIGEON PLUM
COCCOLOBIA DIVERSIFOLIA
Plant Form Evergreen, upright, symmetrical, densely-foliated, pyramidal • **Peak Flowering Period** May to June • **Flower Color** Whitish green • **Fragrance** None • **Peak Fruiting Period** Sept to Nov • **Fruit Color** Green to dark purple • **Fruit Description** Round or pear-shape, thick layer of juicy flesh, grows in clusters • **Taste** Astringent and subacidic

W46 MANGO
MANGIFERA INDICA

Plant Form Evergreen, large and canopy, shade tree • **Peak Flowering Period** Mar to June • **Flower Color** Green to yellow, orange or purplish-red • **Fruit Description** Usually oval or round, smooth skin, flesh is juicy with soft fibrils • **Taste** Sweet

W47 SEVEN YEAR APPLE
CASASIA CLUSIFOLIA
Plant Form Shrub or small tree, perennial, multi-trunked • **Peak Flowering Period** All year • **Flower Color** White and pink-tipped • **Fragrance** Fragrant flowers • **Peak Fruiting Period** All year • **Fruit Color** Green to yellow-green and nearly black • **Fruit Description** Large lemon shape, juicy pulp that contains many inedible seeds • **Taste** Sweet to liquorish

W48 BANANA
MUSA SPP.
Plant Form Large shrub, perennial, leaves are among the largest of all plants • **Peak Flowering Period** All year • **Flower Color** Orange and purple • **Fragrance** None • **Peak Fruiting Period** All year • **Fruit Color** Ranges from green, yellow, purple or brown • **Fruit Description** Resembles a long curving cylinder, narrow ends, skin is smooth and thick, with vertical ridges. Flesh is creamy white and soft • **Taste** Sweet

9

W49 GRAPEFRUIT
CITRUS PARADISI
Plant Form Evergreen, medium-sized tree, rounded top, spreading branches • **Peak Flowering Period** Jan to May • **Flower Color** White • **Fragrance** Aromatic flowers • **Peak Fruiting Period** Nov to Feb • **Fruit Color** Yellow-orange • **Fruit Description** Nearly round or oblate, thick skin, juicy pulp • **Taste** Tart and tangy

W50 ORANGE
CITRUS SPP.
Plant Form Evergreen, compact, ornamental, small tree • **Peak Flowering Period** Apr to July • **Flower Color** White • **Fragrance** Fragrant flowers • **Peak Fruiting Period** Oct to July • **Fruit Color** Golden yellow • **Fruit Description** Usually round or oval shape, edible skin, juicy pulp • **Taste** Peel is sweet, flesh is sour

W51 KUMQUAT
FORTUNELLA SPP.

Plant Form Evergreen, compact, ornamental, small tree • **Peak Flowering Period** Apr to July • **Flower Color** White • **Fragrance** Fragrant flowers • **Peak Fruiting Period** Oct to July • **Fruit Color** Golden yellow • **Fruit Description** Usually round or oval shape, edible skin, juicy pulp • **Taste** Peel is sweet, flesh is sour

10

W52 GUAVA
PSIDIUM SPP.
Plant Form Evergreen, shallow-root shrubs or small trees, spreading branches close to the ground • **Peak Flowering Period** All year • **Flower Color** White • **Fragrance** Flowers faintly aromatic/ leaves aromatic when crushed/strong, sweet, musky odor when ripe • **Peak Fruiting Period** All year • **Fruit Color** Light green to yellow, dark green or maroon • **Fruit Description** Round or pear-shape, thin edible skin, juicy flesh • **Taste** Sweet and slightly acidic

W53 STAR APPLE
CHRYSOPHYLLUM CAINITO
Plant Form Evergreen, medium-large sized, short trunk • **Peak Flowering Period** All year • **Flower Color** Greenish-yellow, yellow, or purplish-white • **Fragrance** None • **Peak Fruiting Period** June to Aug • **Fruit Color** Red-purple, dark-purple, or pale-green • **Fruit Description** Round baseball size, pulp is soft • **Taste** Sweet

W54 TAMARIND
TAMARINDUS INDICA
Plant Form Evergreen, large tree, round shape, dense crown • **Peak Flowering Period** June to Aug • **Flower Color** Red yellow • **Fragrance** None • **Peak Fruiting Period** Aug to Sept • **Fruit Color** Brown • **Fruit Description** Glossy brown pods • **Taste** Sweet and sour

W55 JAMAICA CHERRY
MUNTINGIA CALABURA
Plant Form Evergreen, horizontal branching, large tree • **Peak Flowering Period** Mar to Oct • **Flower Color** White • **Fragrance** None • **Peak Fruiting Period** Apr to Oct • **Fruit Color** Red or yellow • **Fruit Description** Wide with smooth, thin, tender skin and light-brown, soft, juicy pulp • **Taste** Very sweet, musky, fig-like flavor

W56 PINEAPPLE
ANANAS COMOSUS
Plant Form Deciduous, short stout stem with a rosette of waxy, straplike leaves • **Peak Flowering Period** June to Aug • **Flower Color** Light purple to red • **Fragrance** None • **Peak Fruiting Period** Nov to Feb • **Fruit Color** Brownish-yellow scales with green tufted leaves on the top • **Fruit Description** Cylindrical and oval, fruit develops from many small fruits fused together • **Taste** Sweet and tart

11

W57 PASSION FRUIT
PASSIFLORA EDULIS
Plant Form Evergreen, vine • **Peak Flowering Period** May to Oct • **Flower Color** White • **Fragrance** None • **Peak Fruiting Period** July to Oct • **Fruit Color** Yellow or dark purple • **Fruit Description** Round to oval, skin turns translucent and waxy as ripens • **Taste** Sweet and seedy

W58 POMELO
CITRUS GRANDIS
Plant Form Evergreen, crooked trunk and low, irregular branches • **Peak Flowering Period** Mar to June • **Flower Color** White • **Fragrance** None • **Peak Fruiting Period** All year • **Fruit Color** Pale green to yellow • **Fruit Description** Globular to oblate, thick peel with cotton-textured pith • **Taste** Sweet and slightly acidic

W59 TAMARIND
TAMARINDUS INDICA
Plant Form Evergreen, large tree, round shape, dense crown • **Peak Flowering Period** June to Aug • **Flower Color** Red yellow • **Fragrance** None • **Peak Fruiting Period** Aug to Sept • **Fruit Color** Brown • **Fruit Description** Glossy brown pods • **Taste** Sweet and sour

W60 LIME
CITRUS AURANTIFOLIA
Plant Form Evergreen, shrubby, spreading branches • **Peak Flowering Period** All year • **Flower Color** White in clusters • **Fragrance** Aromatic leaves • **Peak Fruiting Period** Apr to June, Oct to Dec • **Fruit Color** Dark green to light green and yellow • **Fruit Description** Oval and tender, juicy pulp • **Taste** Tart and acidic

W61 JAMAICA CHERRY
MUNTINGIA CALABURA
Plant Form Evergreen, horizontal branching, large tree • **Peak Flowering Period** Mar to Oct • **Flower Color** White • **Fragrance** None • **Peak Fruiting Period** Apr to Oct • **Fruit Color** Red or yellow • **Fruit Description** Wide with smooth, thin, tender skin and light-brown, soft, juicy pulp • **Taste** Very sweet, musky, fig-like flavor

W62 SATIN LEAF
CHRYSOPHYLLUM OVILIFORME
